## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1, 2, 4-19, 21-32 are allowed over the prior art of record.
2. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the prior art fails to disclose or make obvious a method of minimizing the variations in optical pathlengths in a testing apparatus having the steps of arranging the illumination source adjacent to a reflective enclosure that at least partially encloses the sample in a radial direction with no more than a single opening in the radial direction, any opening in the reflective enclosure being substantially equal or smaller in size than the width of the sample, and at least one of the radiation sources being located within the reflective enclosure, and in combination with the other recited limitations of claim 1. Claims 2, 4-17 are allowed by the virtue of dependency on the allowed claim 1.

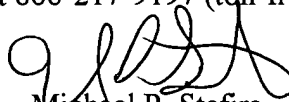

Regarding claim 18, the prior art fails to disclose or make obvious a testing apparatus for simulating sample homogeneity having a source of illuminating radiation for illuminating a sample, the illumination source being arranged adjacent to a reflective enclosure that at least partially encloses the sample in a radial direction with no more than a single opening in a radial direction, any opening in the reflective enclosure being substantially equal or smaller in size than the width of the sample, and the source of illuminating radiation being in the form of one or more radiation sources, at least one of the radiation sources being located within the reflective enclosure, and in combination with the other recited limitations of claim 18. Claims 19, 21-32 are allowed by the virtue of dependency on the allowed claim 18.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
